Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bulgrin Pat. No. 5,456,870 (col. 8, lines 59-col. 9, line 12 and col. 20, lines 18-54).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bulgrin Pat. No. 5,456,870 as applied to claims 1 and 3-8 above, and further in view of either Hehl, Pat. No. 5159957 or JP 61-234120.
5. Bulgrin (col. 20, line 59-col. 21, line 2) discloses the cooling by the dissipation of heat to the atmosphere. Hehl and JP'120 each teach controlling the temperature of the cylinder member by a cooling apparatus disposed at the supply port. It would have been obvious to a person of ordinary skill in the art to provide a cooling apparatus

disposed at a supply port in Bulgryn when the amount of cooling by the atmosphere is not sufficient to provide the desired control temperature.
